

About

Ghost Of A Star is a track composed and recorded by swefn during the final week of May 2025 in Eora / Sydney. The song is accompanied by the interlude *hwisprian*, a minimal, abstract and experimental drone piece.

Siderear emanations, forest rhythms, jagged edges, spirits in the room, nocturne.

The heritage of the music rests with unconscious traces of baroque, galant, folk, noise (power electronics) materialised as IDM / experimental electronic dance layered with laconic lyrics and ethereal vocal samples.

History

[swefn](#) is the solo experimental electronic music project of Sydney-based musician Cyllan Wednesday. The music is drawn from dreams, mystical energy and veiled dimensions.

The songs vary from intelligent dance music featuring atmospheric vocals to droning cinematic pulsations and eldritch soundscapes. A sonic exploration of hidden auras and the sense of simultaneous stasis and movement.

swefn first debuted as a live act when opening for Danish musician [Vanity Productions \(Posh Isolation\)](#) at the venue Fata Morgana in Eora / Sydney, June 2023.

While rare recordings of their work exist, their first official song *Ghost Of A Star* will be out on 20th August 2025 across streaming platforms and select radios.
