Bio
swefn (sweven) is the solo experimental electronic music project of sydney-based musician Cyllan Wednesday. The music is drawn from dreams, mystical energy and veiled dimensions.

The songs vary from experimental electronic dance music featuring atmospheric vocals to droning cinematic pulsations and eldritch soundscapes. A sonic exploration of hidden auras and the tension between stasis and movement.

Across their practice, they seek to express the intangible through material sound, tracing how spirit might emerge through sonic form.

swefn first debuted as a live act when opening for Danish musician Vanity Productions (Posh Isolation) at the hidden venue Fata Morgana in Eora (Sydney) in June 2023. Their first official song Ghost of a Star was released in August 2025 across streaming platforms and select radios.

While currently working on their debut album, their next single Omen is slated for release in January 2027. Modal shifts, hypnotic rhythms, alien whispers.
